

Kumaraguru Sustainability and Livelihood Institute (KSLI)

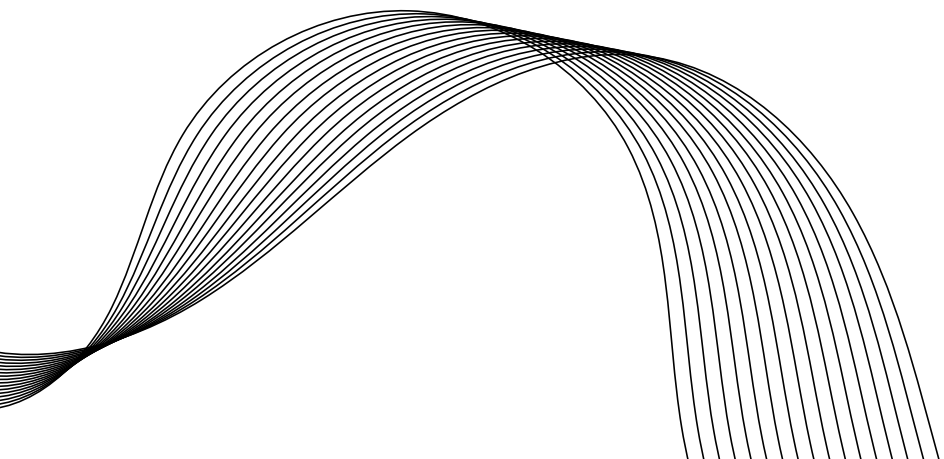

Vision

Advancing sustainability and livelihoods through research, education, entrepreneurship, and community transformation.

Mission

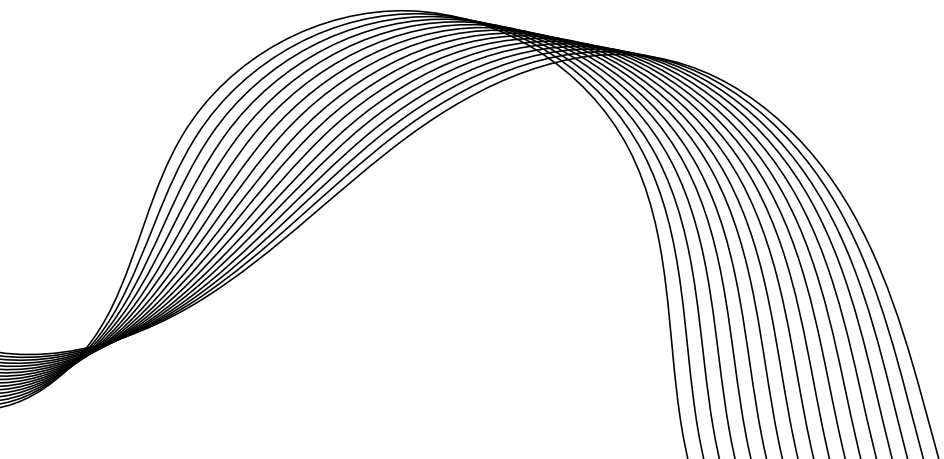

To design and deliver integrated solutions that advance sustainability and strengthen rural livelihoods by combining applied research, practice-oriented education, entrepreneurship incubation, and long-term partnerships with farmers, industry, and institutions.

Purpose

KSLI is proposed as a strategic institutional platform to consolidate, lead, and scale sustainability- and livelihood-focused initiatives, aligning academic programs, research, partnerships, flagship events, and community engagement under a single governance and identity.

Sustainability

Livelihood

Sustainability - Focus Areas

Resource Efficiency

Address global challenges, innovate in renewable energy technologies, and contribute to reducing carbon footprints, fostering a more sustainable and eco-friendly future.

Sustainable Agriculture

Design solutions that enhance agricultural productivity, mitigate climate change, and ensure food security while promoting environmental sustainability and resilience.

Nature Conservation

Develop sustainable solutions that protect biodiversity, reduce deforestation, and mitigate human-wildlife conflict, contributing to long-term environmental sustainability and the protection of global ecosystems.

Sustainable Human Settlements

Apply technical knowledge to design, plan and create efficient, eco-friendly urban and rural settlements through green infrastructure. Drive innovations in energy, water, waste management, and green technologies.

Livelihood - Focus Areas

Farm-Based Livelihood

- Agriculture
- Animal Husbandry
- Integrated Farming Systems

Off-Farm Livelihood

- Agro-Processing
- Rural Manufacturing
- Value Addition Enterprises

Non-Farm Livelihood

- Rural Services
- Trade
- Micro Enterprises

Thrust Areas

Research & Field
Innovation

Development
Projects

Education & Capacity
Building

Entrepreneuership
Development

Campus Sustainability - Microcosm

Energy Efficiency

- 250 KW - Solar Operations
- Energy Monitoring System
- Energy Audit

Waste Management

- Resource Recovery Park
- Sewage Treatment Plant
- Bio Gas Installation

Biodiversity

- Ahimsa Vanam
- Native Tree Nursery
- Honey Extraction

Water Security

- RWH / Tanks
- Aerators Fixation
- Water Audit & Quality Report
- Storm Water Management

Stewardship Programs

- Sustainability Tour
- Bird Watching
- Nature Camps / Walks
- Sustainability Education

Sustainability Pathway

Objectives and Roadmap

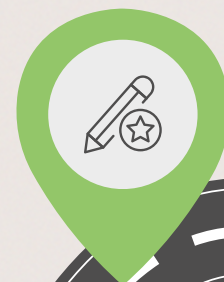

Prototyping Semester

A 20 weeks Graduate Innovation Engineer Certification that will be offered by Forge as a comprehensive skills and competency development program that embeds an innovation-centered approach to engineering education..

5 & 6

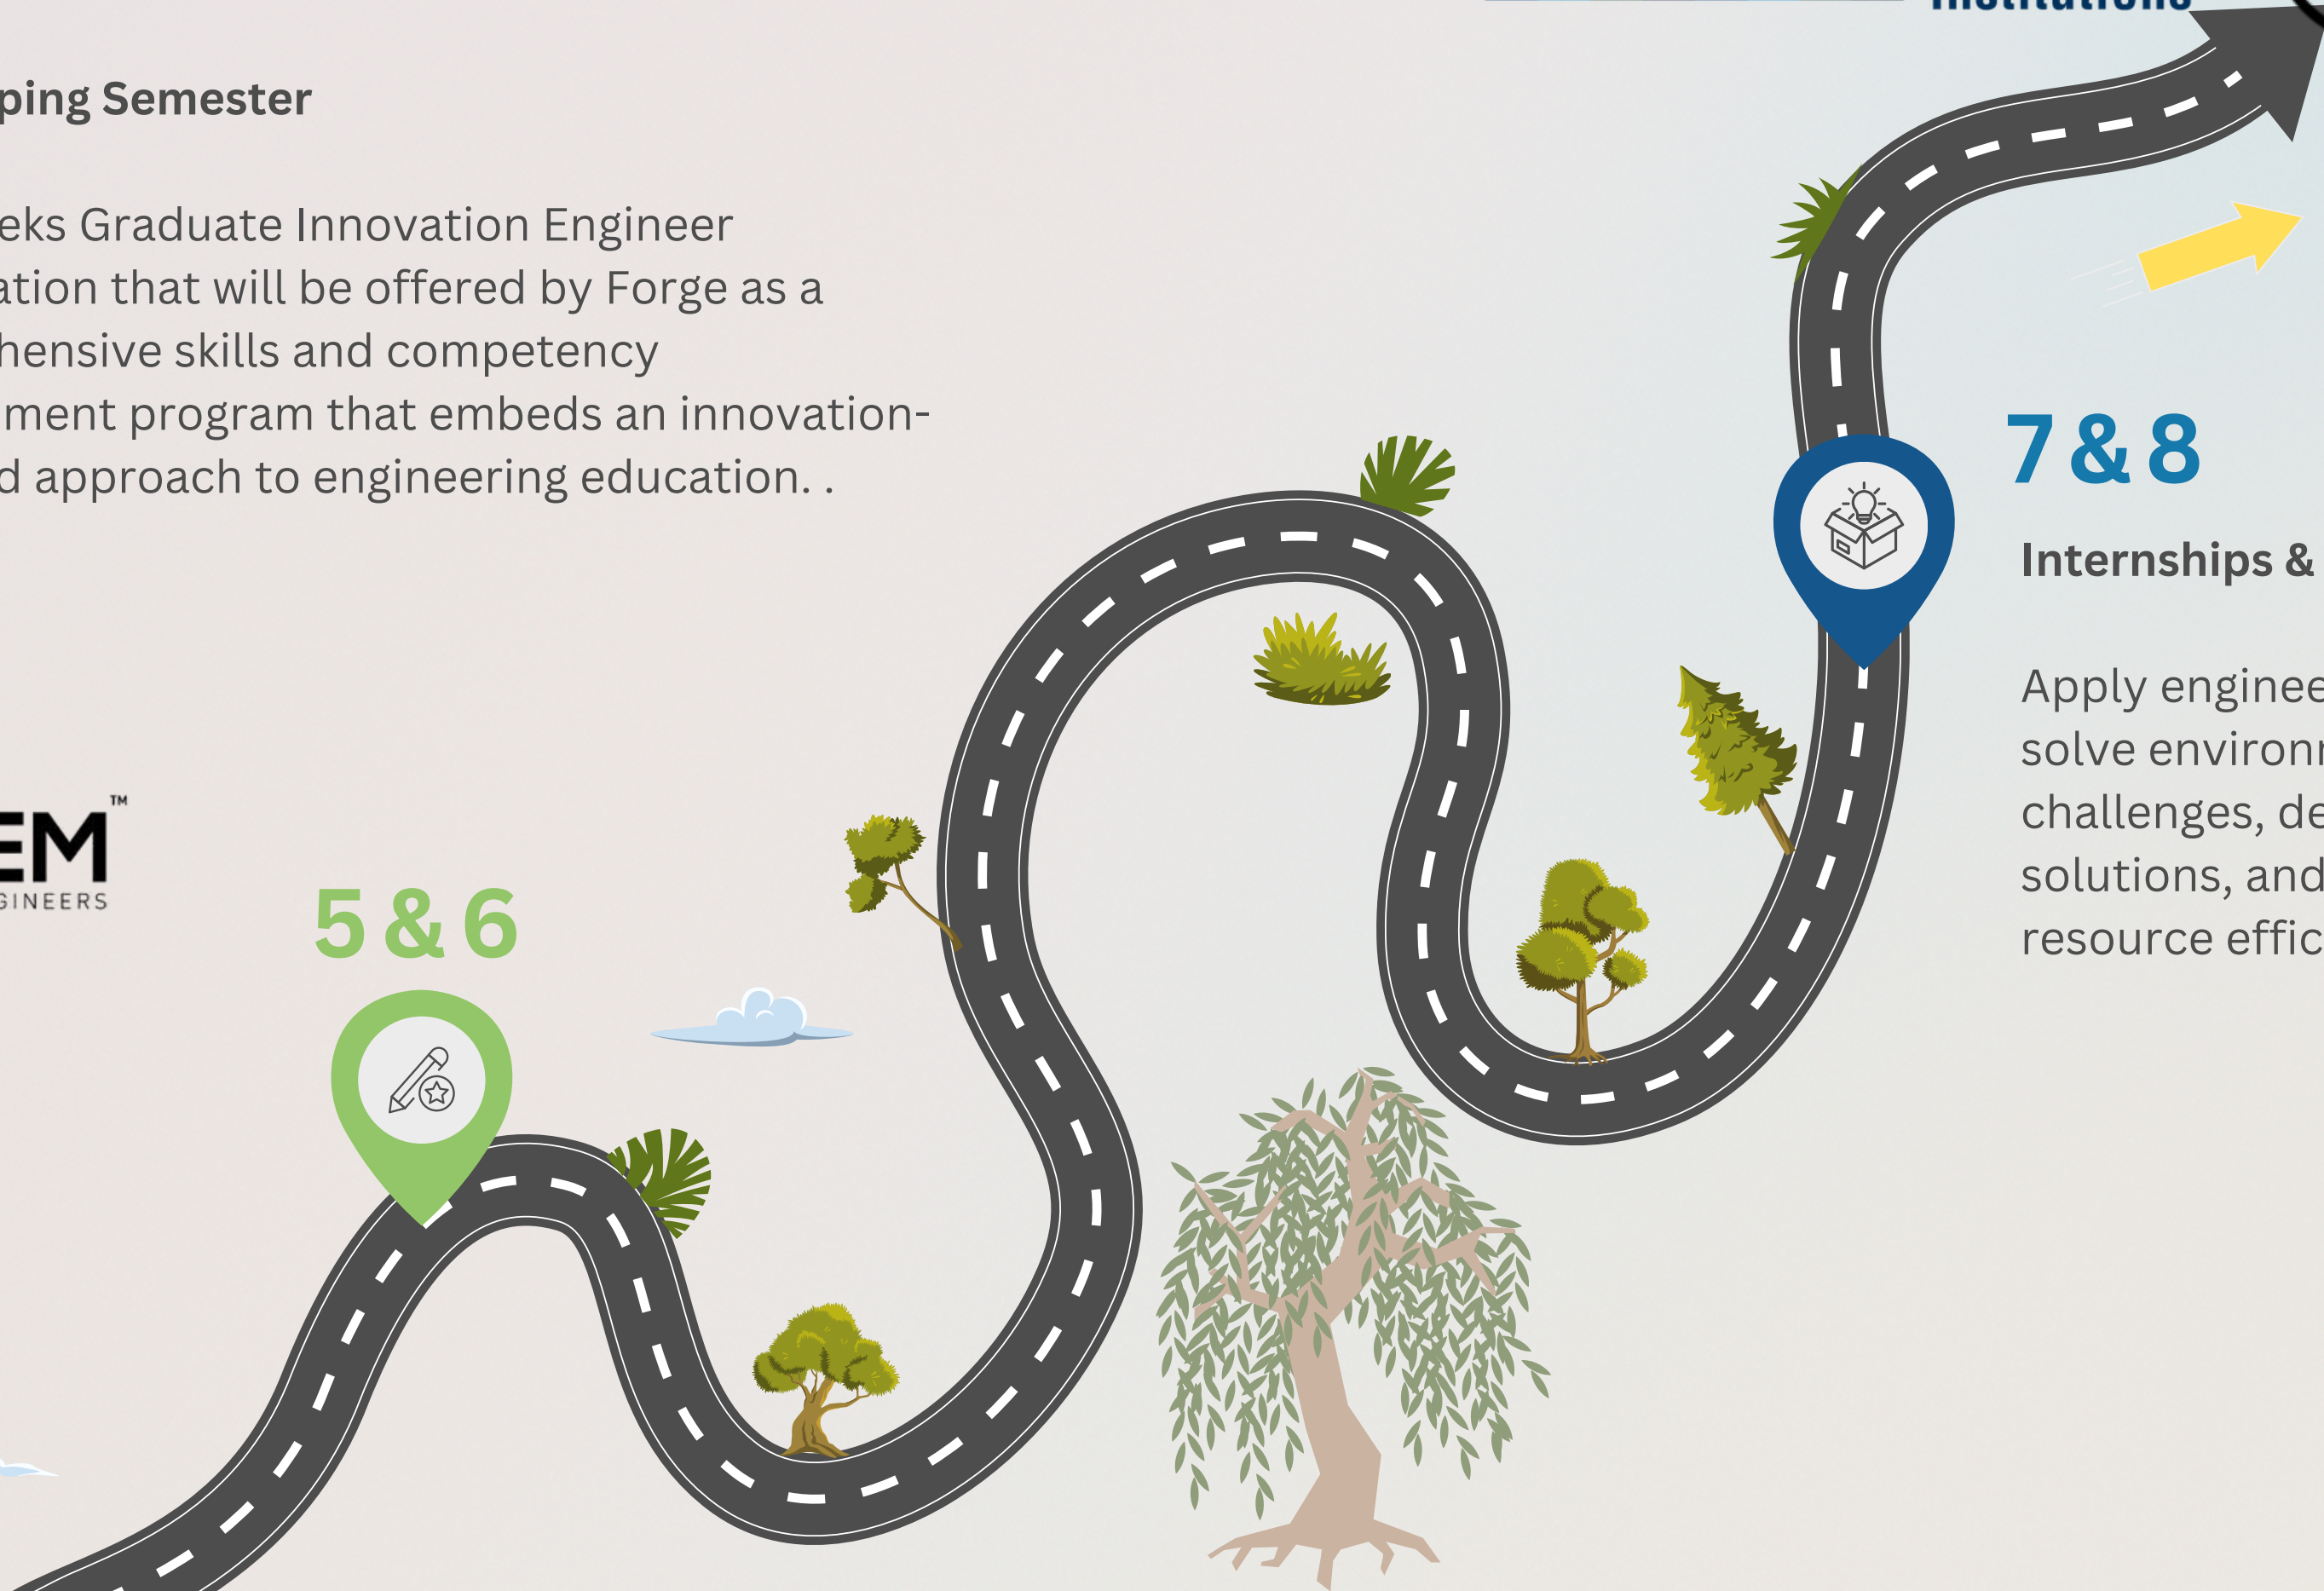

7 & 8

Internships & Capstone Project

Apply engineering principles to solve environmental challenges, design sustainable solutions, and promote resource efficiency.

Workshops | Certificate Programs

PG Diploma

- Dairy Farm Management
- Integrated Farm Management
- Sustainability Management

Exposure Visit

- International Summer School
- Dairy - Value Addition Trainings & Visits
- Nature Camps / Walks

Certificate Programs

- Dairy Farm Management
- Goat / Sheep Farm Management
- Mushroom Cultivation
- Equine Management

Environmental
Defense
Fund

Academic Programs

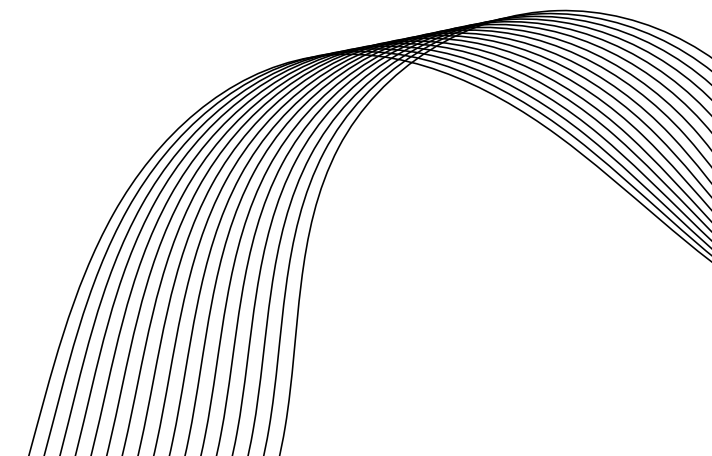

MBA - Agri Business Management

MSW - Master of Social Work

M.E - Environmental Engineering

MBA - Sustainability
Management

BSW - Bachelor of Social
Work (Sustainability Focus)

Research

Climate Smart Dairy

- Productivity enhancement through entrepreneurship and farmer capacity building
- Digital, Evidence-Based Extension for Smallholder Dairy Productivity

Sustainable Agriculture

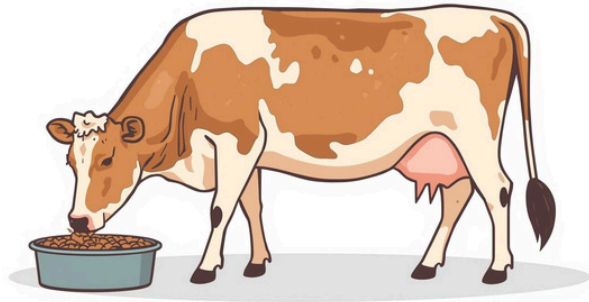

- Fertilizer Optimization (N-Balancing) Program in Sugarcane
 - 5000 farmers supplying to Sakthi Sugars
 - Integrated research + extension model

Dutch Fund for Climate Action (DFCD)

- Climate adaptation grant (~₹5 crore) implemented by WWF India
- Focus on scalable nature-based solutions

Centre of Excellence

CoE - Dairy

CoE - Sugarcane

**CoE - Social
Development**

Livelihood Projects

Climate Smart Dairy Entrepreneurship Program

Pariyur Farmer Producer Organization

Farmer 360 Initiative

Young Farmers Forum

StartupTN

**Environmental
Defense
Fund**

CSR Funded Livelihood Projects

**Uzhavan Foundation,
Manaparai**

**Armour Steel
Buildings, Salem**

Events

Sustainability

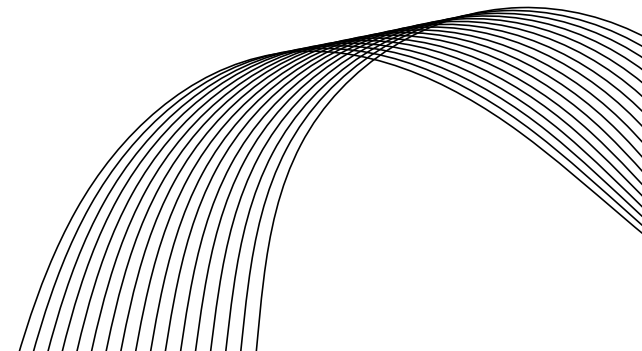

- Dairy Yatra
- Livestock Hackathon
- Student Conclave for Climate Action
- Western Ghats Festival
- Agri Yatra

Livelihood

- Young Farmers Conclave
- Sugarcane Conference
- Kongunadu Velan Matrum Kaalnada Thiruvizha

Kumaraguru
**Livestock
Hackathon**

Current Team

Dairy

- Dr Thanammal
- Nethaji Subash (Program Management)
- Kavin (Program Associate)
- Arun Kumar (Field)
- Bharani (Admin Support)
- Vacancy 1 - Veterinarian
- Vacancy 2 - Program Associate
- Vacancy 3 - Monitoring & Evaluation

Sugarcane

- Dr Hemalatha
- Boopathy (JRF)
- Bhuvaneshwari (JRF)
- Sujeeth (Field Coordinator)
- Gokulraj (FC)
- Vacant 1 (FC)
- Vacant 2 (FC)
- Vacant 3 (FC)

Farmer 360

- Mr Sezhian
- Dr Gopi
- Dr Sudhakar
- Mr Amarendran
- Ms Sangeetha

Campus Sustainability

- Keerthana
- Jeevesh
- Paramaguru

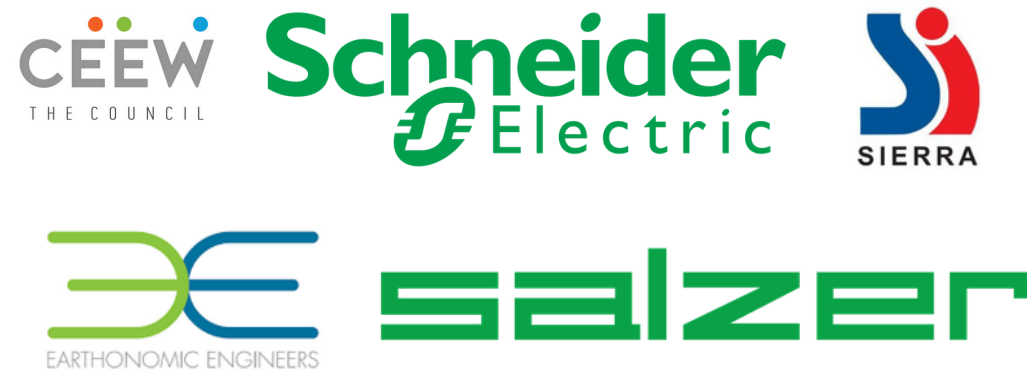

Farmer Producer Organization

- Shanthra (CEO)
- Gowsika (Accountant)
- Karthika (Extention Officer)
- Nithya (Business Executive)

Partners

Resource Efficiency

Sustainable Agriculture

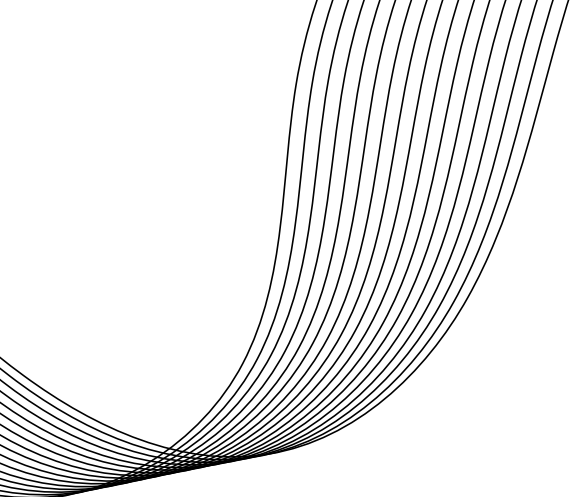

Nature Conservation

Green Buildings

Thank You...
